

I **oppose** H.B. 6355, and I urge you to make sure it does not get enacted.

CT already has effective laws to deal with people who are probable threats by firearms, and these laws are reasonable and are working.

This proposed law makes it entirely too easy for anyone with a grudge or dislike of someone to have their firearms confiscated, and the burden of proof of getting them returned is on the firearms owner, who must prove he is not a threat. In other words, guilt is presumed without investigation or evidence.

This is a very bad bill, and I urge you to **OPPOSE** it.
